

# “Slam-Lock” Interlocking Deadbolt

The “Jimmy-proof” design and automatic locking function of the Slam-lock make it ideal for residential or commercial areas where door re-locking is important. The automatic locking function can be inactivated with a simple push-button. The Slam-lock is solid bronze alloy and boasts an attractive 2-tone brushed appearance.

**Internal High Strength Carbon Steel components** provide high security and reliable operation

**Shutter-Guard** prohibits tampering with the lock if the outer cylinder is compromised.

**Hold-Back feature** allows user to keep door unlocked or to disable exterior key operation.

**Jimmy-Proof automatic locking** concept prohibits entry by spreading the door frame, and conveniently relocks the door upon closing

**Solid High Strength Bronze Alloy** for the ultimate security and durability

## Product Overview
