

# The Segal Lock Company

The original Segal lock was developed in 1912 by Samuel Segal, a New York City Police Officer who saw a need to protect residents from thieves “Jimmying” or spreading the door frame to gain entry. Improvements have been made to the original design, making the Segal Vertical Deadbolt one of the strongest locking devices available through the retail channel.

## The Segal Promise

*High Quality Product Line*  
*Time-Tested, Desirable Brand*  
*Original “Jimmy-Proof” Design*
